

RMIT Design Hub

The Design Hub is aiming to achieve a Green Building Council of Australia (GBCA) **5-star Green Star Education Rating** that signifies “Australian Excellence” in environmentally sustainable design.

In particular the outer skin of the Hub incorporates **automated sunshading** that includes photovoltaic cells, evaporative cooling and fresh air intakes that **improve the internal air quality and reduce running costs.**

The Hub has a large number of **Environmentally Sustainable Design (ESD)** features:

- High-performance double facade
- Rain water harvesting
- Grey water treatment
- Internal waste management system
- Building management system with direct digital control
- Low-volatile organic compound (VOC) paints
- Underfloor air distribution system
