

State Library of Victoria

One of the world's great libraries, the State Library of Victoria is the state's premier reference and research library and a gateway to the world's information. The Library houses items that showcase Victoria's cultural life, past and present, and makes them available to the community through a range of services, exhibitions and cultural programs.

The vision for the original library was ambitious - to contain the 'best of everything' and become 'a great emporium of learning and philosophy, of literature, science, and art'.
